IT SUPPORT

0906891704 | th.2806.dev@gmail.com | <https://thachhiendev.vercel.app>

SUMMARY

Information Technology student with a strong foundation in Software Engineering, System Administration, and Networking. Quick learner with hands-on experience in Linux/Windows administration, Docker containerization, SQL Server, and network troubleshooting. Familiar with system configuration, application deployment, database management, and technical troubleshooting. Seeking an IT Support / Systems position to contribute to reliable IT operations and infrastructure.

TECHNOLOGY STACK

- **Systems & Containerization:** Docker, Docker Compose, Linux (Ubuntu/Alpine CLI), Windows 10/11, Windows Server (Basic), Nginx.
- **Networking:** TCP/IP, Static IP/DNS, Port Forwarding/Mapping, Gateway routing, Wi-Fi AP, Remote Desktop (RDP, AnyDesk).
- **Databases:** Microsoft SQL Server (Queries, Backups, Table schema, Connection Strings, EF Core Migrations).
- **IT Support & Troubleshooting:** Docker Logs Debugging, Network Troubleshooting, CORS Troubleshooting, Git, Postman, Bash (Basic).
- **Programming & Backend:** C# (.NET Core Web API), JavaScript, React (Basic), PHP.

PROJECTS

InternLink Platform | Full-Stack Application & Deployment

Technologies: Docker, Docker Compose, Linux, Nginx, SQL Server, .NET Core API, React.

GitHub Repository: <https://github.com/thachhien-github/InternLink.git>

- **Full-Stack Development:** Developed the React frontend and .NET Core Web API backend, implementing application features and RESTful APIs.
- **Docker Containerization:** Wrote Dockerfiles and Docker Compose files to containerize both React frontend and .NET backend; used multi-stage builds to optimize image size and speed up container startup.

- **Network & Port Mapping:** Configured container port bindings (3000:80, 7109:8080), Docker bridge network, and host-gateway connection (host.docker.internal) so the containerized API can communicate with the host's SQL Server.
- **Database Management:** Configured SQL Server connection strings and environment variables; managed automated database schema migrations and data seeding on application startup.
- **System Troubleshooting:** Debugged container networking issues, resolved CORS errors between frontend and backend, investigated container startup failures using Docker logs, and tested API endpoints via Postman.

HP Auto Detailing Management System | Full-Stack Application

Technologies: ASP.NET Core MVC, SQL Server, Entity Framework Core, SignalR, Identity RBAC.

GitHub Repository: https://github.com/thachhien-github/HP_Detailing.git

- **Full-Stack Development:** Developed the web application using ASP.NET Core MVC, implementing frontend interfaces, business logic, authentication, and SQL Server integration.
- **Database Design & Management:** Designed normalized SQL Server database tables for inventory, tickets, and user accounts; managed database relationships and executed migrations.
- **Authentication & Access Control:** Configured role-based user permissions (Admin, Staff, Customer) using ASP.NET Identity to protect sensitive management data.
- **System Maintenance & Troubleshooting:** Configured application environment settings, troubleshooted database connectivity issues, and resolved data synchronization and real-time notification issues with SignalR.

EDUCATION

Ho Chi Minh City College of Transport

Information Technology (Software Application) | 2024 – 2027

GPA: 3.9/4
