

THACH HIEN

INTERN SOFTWARE ENGINEER

0906891704 | th.2806.dev@gmail.com | HCMCT | <https://thachhiendev.vercel.app>

SUMMARY

Passionate Full-Stack .NET Developer specializing in building high-performance web applications and structured web services. Highly skilled in .NET 10, ASP.NET Core, and ReactJS. Experienced in database modeling, decoupled multi-layered architecture, and AI-assisted development workflows to accelerate software delivery. Seeking an Intern Full-Stack position to contribute to scalable digital business solutions.

TECHNOLOGY STACK

Programming languages	C#, JavaScript, PHP
Frameworks & Libraries	ASP.NET Core, Entity Framework Core, ReactJS, Node.js, Bootstrap
Databases	SQL Server, MySQL, MongoDB
Other skills	3-Tier Architecture, Clean Architecture, RESTful API
Infrastructure & Tools	Git, GitHub, Docker, Postman, Visual Studio, VS Code

PROJECTS

HP Auto Detailing Management System | ASP.NET Core Developer

Technologies: ASP.NET Core 8.0, ASP.NET Core MVC, Entity Framework Core, SQL Server, ASP.NET Identity, SignalR, Tailwind CSS, JavaScript.

GitHub Repository: https://github.com/thachhien-github/HP_Detailing.git

Description & Contributions

- Engineered a production-ready auto detailing management system using ASP.NET Core MVC with clear separation of presentation, business, and data responsibilities.
- Implemented secure authentication and role-based access control with ASP.NET Identity for Admin, Receptionist, Technician, Warehouse, and Foreman roles.

- Built inventory management workflows with Entity Framework Core and SQL Server: purchase receipt processing, automatic stock deduction per service ticket, warehouse imports, and periodic stock audit.
- Developed service ticket lifecycle management, appointment scheduling, technician assignment, quality control approval, invoice generation, and multi-channel payment processing.
- Added real-time notification support using SignalR for instant status updates and internal alerts across workflow participants.
- Automated database migrations and seed data initialization on startup to ensure consistent deployment environments.
- Optimized performance with HTTPS response compression, static file caching, and custom routing for improved UX and maintainability.

InternLink | Full-Stack Developer

Technologies: .NET, ASP.NET Core Web API, React, SQL Server, REST APIs, Clean Architecture, UI/UX Development, System Design

GitHub Repository: <https://github.com/thachhien-github/InternLink.git>

Description & Contributions

- Developed InternLink, a platform designed to connect interns, mentors, and organizations through a structured internship management ecosystem.
- Contributed to the implementation of key modules aligned with the project analysis and interface design, including dashboard, student management, internship management, company management, evaluation and grading, analytics, notifications, and account management.
- Built backend services and RESTful APIs to support core business workflows, data handling, and scalable application logic.
- Collaborated on the front-end implementation to reflect the planned user interface and improve overall usability.
- Supported system design and documentation efforts to ensure the solution remained maintainable, modular, and aligned with the project architecture.

EDUCATION

Ho Chi Minh City College of Transport

Information Technology (Software Application) | 2024 – 2027

GPA: 3.9/4
